

Nextflow from zero to hero

Welcome to the course

Luigi

Youssef

Edoardo

Daniel

Bruno

Matteo

Expectations

What's your current experience using Nextflow?

How do you plan to use Nextflow in your work?

What are your expectations from this training course?

Course Organization

01 Theoretical concepts will be clearly explained through slides

03 Strong emphasis placed on hands-on practical implementation

02 Learning will be interleaved with focused practical exercises

04 Interactive sessions encourage active participation and learning

Course Agenda: At a Glance

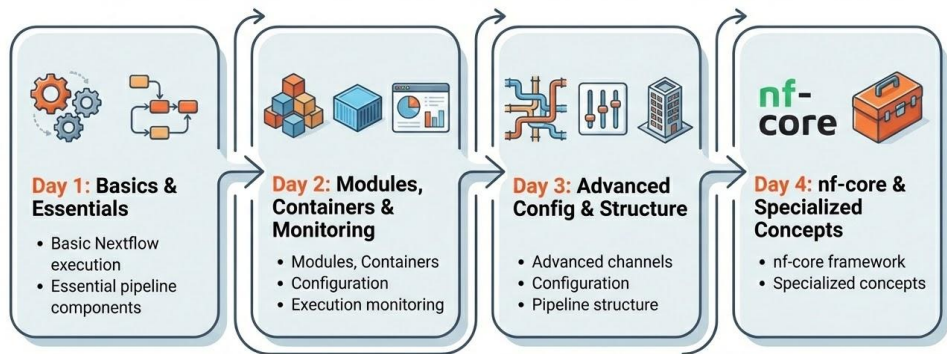

- **Day 1**
focuses on basic Nextflow execution and essential pipeline components
- **Day 2**
covers modules, containers, configuration, and execution monitoring
- **Day 3**
explores advanced channels, configuration, and pipeline structure
- **Day 4**
introduces the nf-core framework and its specialized concepts

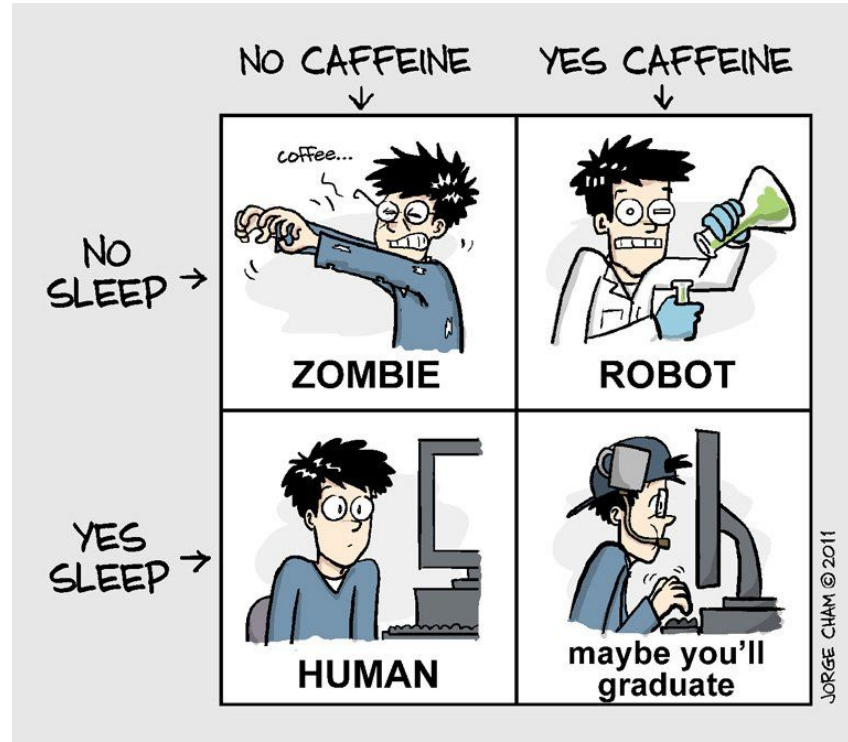

Daily: 9:00 - 17:00

Lunch Break: 13:00 (1 hr)

Coffee is available

Course materials

Course repository:

<https://github.com/HTGenomeAnalysisUnit/nextflow-zero2hero.git>

Course documentation:

<https://htgenomeanalysisunit.github.io/nextflow-zero2hero/>

Shared materials on HPC:

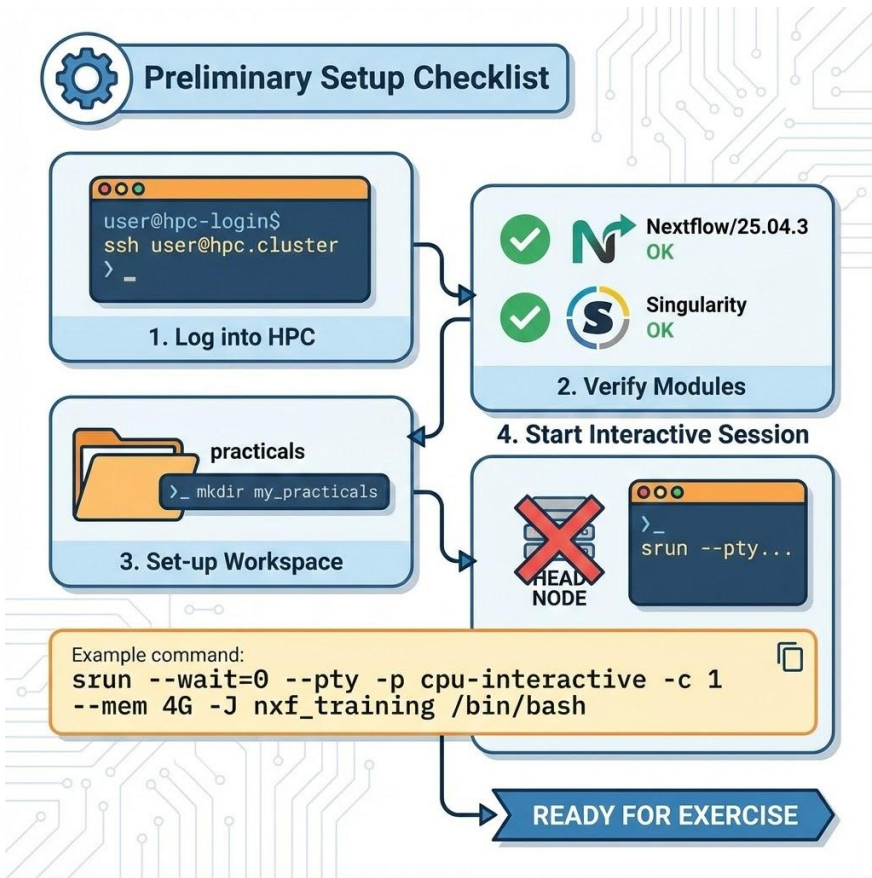

`/project/nextflow_zero2hero`

Example code and practicals:

`/project/nextflow_zero2hero/practicals`

Setup your environment

Practicals welcome intructions:
